

Quantity Surveyor

Job Description

Who we are looking for:

We are looking for a candidate with an appropriate degree level qualification, ideally, but not essential, having achieved a Chartered status and be able to demonstrate a sound working knowledge with a proven track record and portfolio of projects demonstrating their quantity surveying and commercial management experience in the MEP sector.

The successful candidate should be able to demonstrate a sound working knowledge of the various standard forms of contract, construction and contract law, basic plant, equipment, materials and labour costs, employment legislation and working rule agreements.

What we are offering:

The successful candidate would be offered a position within the growing surveying / commercial department within DBS. The department has a wide spread of skills sets and abilities and we pride ourselves with investing in our staff to allow them to progress in their role.

The role would be based out of our Newark office, however projects will be overseen nationally.

The role has a significant amount of responsibility with the Quantity Surveyors overseeing their own projects and reporting to the Commercial Manager. The role requires the ability to work as part of a project team and provide project financial and contractual control, alongside commercial management / guidance. You will be expected to help co-ordinate the efforts of all parties involved in the execution of a project to budgeted cost and programme parameters.

There are also opportunities within the department to become a mentor and offer support and guidance to the apprentices we have within the team who are at various stages of their training.

The role

- In conjunction with the relevant Project Management Team member(s), be accountable for the profitability of the project(s), and develop an appropriate commercial strategy for the project(s) to ensure delivery of required margins
- Contribute to the management and maintenance of a project cost reporting system ensuring all financial information and cost heads are managed, up-to-date and tracked with budget / tender allowances, commitments and deviations highlighted, mitigated or managed
- With other members of the team, produce and provide accurate forecasts of project cost to completion and final value
- Ensure contract variations are identified, valued and turned into agreed variation orders with the customer in a timely manner
- Manage the sub-contract tender process, including the selection of sub-contractors and issue of secondary subcontract orders
- Provide accurate monthly CVR reporting in line with the Company's reporting process
- Submitting and agreeing interim valuations and monitoring project cash flow
- Liaising with Main Contractors and Clients on commercial matters including, but not limited to, the agreement of the primary subcontract, client and domestic variations, interim valuations and the final account agreement.
